EXPERIENCE

KLA C++ Engineer — Aug 2026–Present · Leuven, Belgium

- Made the camera's reported white-balance settings **visible in the UI**.
- Refactored serial control and logging into **reusable components**.

In progress Fault-recovery design and early C++ implementation for the equipment's lift mechanism, with team review.

Pickit 3D Research & Software Engineer — Aug 2025–Mar 2026 · Leuven, Belgium

- **Resolved a field communication failure** caused by a port conflict.
- Built a timezone-aware log download and conversion workflow with a multilingual UI for **incident investigation**.
- Built a reusable Python client for integrating internal tools, with reconnection and message checks; contributed to interface design.

Bosch V2X Communication Intern — Jun–Nov 2024 · Hildesheim, Germany

- Built a V2X demonstrator for **safety scenarios**; tested end-to-end messaging.
- Built the **operator interface** for an eBike safety prototype in React.

TEAM PROJECT & AWARD

TEAM 1st

Color Saves Life — Feb 2024

digital.auto & mobility challenge · BCX 2024

Built the Python client for a driver visual-assistance prototype, integrated eye tracking with simulation and presented the team's demo.

TECHNICAL SKILLS

Languages
C++, C, Python;
TypeScript, JavaScript

Systems & tools
Linux, Git, Docker;
WebSocket / REST; ROS 1/2

Interfaces
React, Qt/QML;
Figma (basic UI)

EDUCATION

Mechatronics — 2026–Present
Bachelor's in progress · KNOU Prime College

Artificial Intelligence — 2025
Bachelor's awarded · Korea National Open University

Computer Engineering (2020) / Business Administration (2022)
Bachelor's degrees awarded
Academic Credit Bank System

TECHNICAL TRAINING

42 — Completed
Software engineering
Seoul / Wolfsburg

SEA:ME — Completed
Automotive & Mobility
Jul 2023–Jun 2024

Korean native · English: IELTS Academic 7.5, Mar 2025
