Kwanho Kim

C++ Software Engineer

Leuven, Belgium kwanho0096@gmail.com kwanho.dev LinkedIn GitHub

Experience

KLA
Aug 2026–Present

C++ Engineer · ICOS Division · Zeta team · Leuven, Belgium

- Analyse **lifter fault recovery**; contribute to design and early implementation across application and controller software, with team review.
- Contribute to camera white-balance configuration, device readback and displayed values.
- Refactor serial device-control integration and logging in a shared equipment layer.

Pickit 3D
Aug 2025–Mar 2026

Research & Software Engineer · Leuven, Belgium

- Contributed to interface design; built a **Python WebSocket client** with reconnect, backoff and message validation.
- Traced a field communication failure to a port conflict and implemented the fix.

Bosch
Jun–Nov 2024

V2X Communication Intern · Hildesheim, Germany

- Built a **V2X demonstrator** and message interfaces; tested end-to-end behaviour.
- Developed a React operator interface for an eBike safety prototype.

Technical skills

Languages	Systems	Tools & UI
C++, C, Python; TypeScript, JavaScript	Error recovery; interfaces; WebSocket / REST; ROS 1/2	Git, Docker, Linux, Qt/QML, React; Figma (basic UI)

Selected projects

C++ containers
42 project · 2022

Implemented vector, stack and an **AVL-tree-backed map** with custom iterators.

Color Saves Life
BCX 2024

Python plugin client, simulation integration and presentation. Team: **1st place** in the digital.auto & mobility challenge.

Education & training

Mechatronics 2026–Present
Bachelor's in progress · KNOU Prime College

Artificial Intelligence 2025
Bachelor's awarded · Korea National Open University

Computer Engineering (2020) / Business Administration (2022)
Bachelor's degrees awarded · Academic Credit Bank System

42 · Software engineering
Seoul / Wolfsburg · Completed

SEA:ME · Automotive & Mobility
Jul 2023–Jun 2024 · Completed

Korean native · English: IELTS Academic 7.5, Mar 2025
