Kwanho Kim

Software Engineer

Leuven, Belgium · kwanho0096@gmail.com · kwanho.dev · linkedin.com/in/kwanhokim · github.com/KKWANH

C++ engineer working on semiconductor inspection equipment at KLA, with earlier robotics software at Pickit 3D and V2X work at Bosch. Focused on device control and communication interfaces, system integration and fault recovery.

EXPERIENCE

KLA C++ Engineer

Aug 2026 – Present · Leuven, Belgium

- **In progress** Fault-recovery design and early C++ implementation for the equipment's lift mechanism, with team review.
- Made the camera's reported **white-balance settings** visible in the UI.
- Refactored **serial control and logging** into reusable components.

Pickit 3D Research & Software Engineer

Aug 2025 – Mar 2026 · Leuven, Belgium

- Resolved a **field communication failure** caused by a port conflict.
- Built a timezone-aware **log download and conversion workflow** with a multilingual UI for incident investigation.
- Built a reusable **Python client** for integrating internal tools, with reconnection and message checks; contributed to interface design.

Bosch V2X Communication Intern

Jun 2024 – Nov 2024 · Hildesheim, Germany

- Built a **V2X demonstrator** for safety scenarios; tested end-to-end messaging.
- Built the **operator interface** for an eBike safety prototype in React.

TEAM PROJECT & AWARD

WINNER 1st

Color Saves Life

Feb 2024

digital.auto & mobility challenge · BCX 2024

Built the Python client for a driver visual-assistance prototype, integrated eye tracking with simulation and presented the team's demo.

TECHNICAL SKILLS

Languages
C++, C, Python;
TypeScript, JavaScript, Bash

Systems & integration
Linux, Docker, Git, Make;
Serial, CAN, D-Bus;
REST, WebSocket

Robotics & interfaces
ROS 1/2, CARLA, OpenCV;
React, Qt/QML, Figma

EDUCATION

Mechatronics 2026 – Present
Bachelor's in progress · KNOU Prime College

Artificial Intelligence 2025
Bachelor's degree awarded · Korea National Open University

Business Administration 2022
Bachelor's degree awarded · Academic Credit Bank System

Computer Engineering 2020
Bachelor's degree awarded · Academic Credit Bank System

TECHNICAL TRAINING

42 Completed
Software engineering
Seoul / Wolfsburg

SEA:ME Completed
Automotive & Mobility
Jul 2023 – Jun 2024

Korean: Native · English: Fluent (IELTS 7.5, 2025) · Japanese: Learner
